Build a Better World

Students just finished up a 6 week summer program at Stiles Elementary. 36 students came over the course of the summer to learn about building a better world. Through 6 field trips, community helpers visiting program, and numerous lessons on our roles in a community, students were pushed to see how they could be a vital part of their community. We are so thankful for the community members that came to program and showed how they contribute to daily life in Columbus!

Service Projects

During the summer our students focused on **Building a Better World**. During the 6 weeks they were taught about what each member can do for our society. After learning about community roles and meeting the police, firemen, and other community members, they had a chance to figure out what role they could play in the community!

Dental Bus

The first two weeks of August, OSU's

Dental Home Bus came to service our students! During the two weeks at Dyer Trailer Park the dentists and dental students filled every last appointment with dozens of children served. Kids received everything from cleanings to pulpotomys. We are so thankful for the partnership with Ohio State's Dental Health Outreach Mobile Experience (HOME).

Lemonaid

This summer our students participated in the Salvation Army's second annual Lemonaid Campaign. Our program held two stands in July and raised \$152 to benefit impoverished children. Students were able to learn the priceless lesson of how kids can help kids in their community.

UPCOMING EVENTS AT STILES

September 25: First day of programming

October 19: Parent Workshop— Math and Reading Resources

October 26: Bowling Field Trip

These 5 students set up their own Lemonaid stands to benefit the Salvation Army this summer. We are so thankful for their initiative and willingness to serve other kids in their community!
